

CHICKEN UNIFAT

Functional Liquid Red Palm Oil for Chicken

Description

Produced by Super-freezing Crystallization Process to retain Red Palm oil natural phytonutrients:

- Rich in carotenoids. Carotenoids (pro-vitamin A), the precursors of vitamin A, it is necessary for animal growth and health.
- Rich in Vitamin E (tocopherols and tocotrienols). Powerful antioxidants to improve oxidative stability, increase shelf life and quality of meat.

Formulated with

- High Performance lysophospholipids enable full digestion and nutrients absorption
- Medium chain triglycerides (MCTs) provide instant energy source for better growth performance.

Features & Benefits

- High quality energy source
- Provide dietary essential fatty acids
- Better skin and shank pigmentation
- Better meat quality
- Improve growth performance, immune and health status

Specifications:

Analysis	Specification
Appearance	Liquid, Red color
Free Fatty Acid (as Palmitic)	Max. 10%
Moisture	Max. 0.5%
Iodine Value	Min. 55
Peroxidase Value	Max. 5.0 meq/kg
Total Fat Content	Min. 99%
Major Fatty Acid Compositions	
C10:0 Capric	Min. 0.5%
C12:0 Lauric	Min. 5%
C14:0 Myristic	Min. 2%
C16:0 Palmitic	Min. 35%
C18:1 Oleic	Min. 35%
C18:2 Linoleic	Min. 8%
Total Fatty Acid	Min. 99%
Melting Point	19°C-21°C
β-Carotene	Min. 500ppm
Vitamin E	Min. 400ppm
Metabolizable Energy	Min. 8300kcal/kg

Note: Standard Specification for reference only, specification may vary depends on raw materials.

Compositions

Crude Palm Olein,
MCT,
Soya Lecithin

Dosage

Species	Addition to Feed Ration
Broiler	2 – 5%

Storage

Store in cool dry place. Keep away from odoriferous materials and avoid direct exposing to sunlight.

Packing size

25Kg
